

## THE SOFTWARE FOR THE MEKAPHARM SOLUTIONS

To accompany our **OMEGA** robot, **APOTEKA** automaton, **OPTIMA** combination and **ALPHA** sorter solutions, we use a number of components and software applications. Intuitive and effective, the software has been developed in line with the expectations and specific needs of pharmacists. Here is an excerpt!

Software	Use of the software	OMEGA	APOTEKA	OPTIMA	ALPHA
MEKASOFT	Provides comprehensive routine management of the automated dispenser and the robot (restocking report, indication of minimum stocks, reserve management and inventory assistance, help in creation of new references) and the rapid exchange of information between APOTEKA and CDAPI for accelerated validation of every day orders	X	X	X	X
SMARTDRIVE	Controls the conveyance: acceleration of work for a number of orders, the current one triggers the next one when the critical point is reached with important energy savings	X	X	X	N.A.
CDAPI	Information system between the robot and the pharmacy via the CDAPI standard: stock management software	X	X	X	X
Ibase : Cloud computing	National online database: useful for new products: elimination of computer handling	X	X	X	X
Optimum Analysis	Audit and advice service on the evolution of rotations	automatic	X	X	N.A.
Laser Telemetry	Automatic physical counting for perfect and constant knowledge of stock	X	N.A.	X	N.A.
Data matrix code reader	Allows traceability through identification of each product	X	X	X	X
E com	Software dedicated to the collection and analysis of technical data for each installed solution. It automatically diagnoses most malfunctions and is even able to provide a patch automatically!	X	X	X	X
